STEERING GEAR TEST ROUTINES

These routines should be carried out as per the set requirements and if there is doubt as to the performance of the steering gear, Check of steering gear test routines should be performed to avoid steering gear issues in that vessel.

Item	Initial	Onboard	Checked	Remarks
	checked	for	by	
Check whether percentage rate of autopilot				
Check response to manual steering, monitor and confirmed from all bridge positions using auto-steering gear power unit & safe set together	<input type="checkbox"/>			
Check whether correct if the vessel is in port				
Check coordination between bridge and steering gear compartment officer	<input type="checkbox"/>			
Check response to manual steering standard and confirmed from all bridge positions using auto-steering gear power unit & safe set together	<input type="checkbox"/>			
Check steering gear test routines for steering gear compartment				
Check coordination between bridge and steering gear compartment officer	<input type="checkbox"/>			
Direct operator of the following test and confirmed				
- Man in steering gear*	<input type="checkbox"/>			
- Available steering gear	<input type="checkbox"/>			
- Steering gear control systems	<input type="checkbox"/>			
- Steering position on the linkage	<input type="checkbox"/>			
- Emergency power supply	<input type="checkbox"/>			
- All valve engines/door operators down to correct order position	<input type="checkbox"/>			
- Remote steering gear control system power failure alarm	<input type="checkbox"/>			
- Steering gear power unit failure alarm	<input type="checkbox"/>			
- Automatic loading arrangements and other automatic equipment	<input type="checkbox"/>			
Check whether correct if the vessel is in port				
Emergency steering gear test routines, check as best as possible, monitor and do not evaluate direct control from left to the steering gear compartment, also coordinate test procedures with bridge and when applicable, the operation of alternate power supplies				
* Checks will have:				
- Confirm that the full order movement matches the required capabilities of the steering gear				
- Check the limit of order movement from both sides to full stop using each steering gear power unit singly and together to make sure it is consistent with previous tests and				
- Visually inspect the emergency and bridge for leaks or damage				
Changeover procedures				
The regular steering gear should be tested as an opportunity for all bridge watchkeepers to provide an indication of emergency steering gear control, provide an opportunity. Typically these will include:				
- Automatic test loading, (check for steering control)				
- Automatic loading control to test steering				
- Stand steering to emergency steering				
- Stand steering to emergency steering
