Cable reel EZwinder - 33mtr - 3x2,50 - H07RN-F - black neoprene cable

Number: 4.28.0008

SPECIFICATIONS

Made in: Netherlands

HS Code: 85444995

DESCRIPTION

Length: 33 meters
Cores: 3x2.50 mm²
Cable: H07RN-F
Rolled (max): 1500 W
Unrolled (max): 3500 W
Protection class: IP 44

Heavy duty construction reel with neoprene cable, 4-way contact plate with splash-proof sockets and valve covers (IP44).

The EZ Winder is the most robust construction reel equipped with a wear-resistant neoprene cable (oil and UV resistant) and a new, 4-way contact plate with splash-proof sockets with spring valve covers (IP44) and earthing.

Work extra safely outdoors thanks to the splash-proof sealing ring in the sockets.

The EZ frame prevents the cable from getting stuck between the coil and the frame.

EZ Winder is comfortable to use due to the transverse handle, rotating winding knob, thermo-soft grip and reel brake. Equipped with thermal protection, molded earthed plug, impact-resistant reel drum made of injection molded rubber, epoxy-coated steel EZ tube frame with powder coating.

Dimensions: 410 x 340 x 200 mm.
