DESCRIPTION

Record of Inspection and Maintenance of Mooring Equipment Book

Our new book, „Records of Inspection and Maintenance of Mooring Equipment including Lines”, Art.-Nr. 139, addresses the new IMO regulations from January 2024 released in the Res.MSC.474 (102). Each page provides space for documenting a piece of equipment, its inspections and its repairs. Since many pieces of equipment on board are in use for longer periods of time, reference numbers can be noted in the topline of the page referring to previous or following pages or books, thus fulfilling record requirements.

Complying with: SOLAS Chapter II-1 Part A-1
