NV Atlas Nederland NL 2 - Waddenzee - 2025

Number: 5.15.0285-2025

SPECIFICATIONS

Made in: Germany

HS Code: 49059900

DESCRIPTION

The NL2 is the ideal chart to experience the Waddenzee region. The water sports area is characterized by a high tidal range and a rough, sometimes almost untouched landscape. The chart covers the German island Borkum, but then quickly goes over to the Dutch side. There you can find Schiermonnikoog, Ameland, Terschelling, Vlieland and Texel, the five inhabited islands in the Wadden Sea, all of which have a large marina. But the coastal areas from the mouth of the Ems via Lauwersoog to the beginning of the IJsselmeer are also covered. The current nautical chart of the Waddenzee contains all nautically relevant information such as depths, buoys, restricted areas, tides etc. and is the basis for a safe journey. In this sea area you can expect rough winds, changeable tides and sometimes longer waiting times when entering and leaving a port. It is also helpful to familiarize yourself with the conditions in the Wadden Sea before starting your journey. But for this you are rewarded with a nature that sometimes seems deserted with long, bright beaches, dunes, small fishing villages and beautiful sandbanks. An area that may demand a bit of flexibility, but which you can also enjoy to the fullest. Thanks to the clear structure of the nautical chart, the skipper can quickly find approaches, harbours and anchorages and is informed of important navigational details that also appear in the NV Charts app. The tide data and current information are also available in the app. The chart series impresses with its detailed scales and optimal sheet cuts. This chart set contains 1 Passage Charts 11 Coastal Charts 17 detailed charts Code for the nv charts App Digital charts & navigation program 365 days licence Current data in the digital charts Tidal calendar Paper harbour plans & Digital Meets legal requirements for up-to-date paper charts on board Update - Update The chart sets for the Netherlands are published annually in updated editions. For the digital nautical charts updates are made available as downloads at the beginning of the season. Up-to-date nautical charts are the basis of safe navigation. NV Charts offers a monthly updating service for its North Sea charts from April to October. So that your charts are always up to date.
 NV Atlas chart format NV Charts nautical charts are available in an outstandingly practical, handy atlas booklet format and thus offer many advantages over formats from other manufacturers. The nautical chart series have been designed by nautical experts and passionate water sports enthusiasts with the needs of recreational boating in mind. The NV Atlas has a very flat staple binding in the middle, so that the course triangle can also be used there without any problems. This innovative development makes it possible to look up charts quickly and always have them in the best possible order at the same scale. The NV Atlas is delivered in a plastic cover protected against splash water. This modern nautical chart format is very popular on sailing boats as well as on motor yachts and is the preferred choice of many of our customers.
