NV Atlas NL 6 - Binnen - Waterkaart Nederland Noord - Friesland - Arnhem - 2025

Number: 5.15.0301-2025

SPECIFICATIONS

Made in: Germany

HS Code: 49059900

DESCRIPTION

For the northern part of the Dutch inland waters, the NL6 is a practical and handy travel companion. Together with the NL7 (Waterkaart Nederland Zuid) the entire inland area of the country can be explored. Cities such as Groningen in the north and Arnhem in the south of the map are also covered in this atlas. The canals, typical for the Netherlands, are almost all navigable and interconnected. The small lakes, canals and little towns offer a charming atmosphere. In contrast to the areas on the North Sea, strong winds, currents and tides are not typical in the inland waterways, which is why you can take it a little easier there overall. The perfect area for beginners or sailors who want to gain a little extra experience. If you long for harmony and don't want to pay attention on currents and tides too much, you will have a lot of fun in the inland waters and with the NL6! Thanks to the clear structure of the nautical chart, the skipper can quickly find approaches, harbours and anchorages and is informed of important navigational details that also appear in the NV Charts app. The tide data and current information are also available in the app. The chart series impresses with its detailed scales and optimal sheet cuts. This chart set contains 23 Passage Charts, 17 Coastal Charts and 17 detailed charts. Code for app: Digital charts & navigation programme. Direct transitions to coastal regions. Port plans paper & Digital. Meets legal requirements for up-to-date paper charts on board. NV Atlas chart format. NV Charts nautical charts are available in an outstandingly practical, handy atlas booklet format and thus offer many advantages over formats from other manufacturers. The nautical chart series have been designed by nautical experts and passionate water sports enthusiasts with the needs of recreational boating in mind. The NV Atlas has a very flat staple binding in the middle, so that the course triangle can also be used there without any problems. This innovative development makes it possible to look up charts quickly and always have them in the best possible order at the same scale. The NV Atlas is delivered in a plastic cover protected against splash water. This modern nautical chart format is very popular on sailing boats as well as on motor yachts and is the preferred choice of many of our customers.
