NV Atlas France - FR 2 - Cherbourg à St. Malo - 2025

Number: 5.15.0310-2025

SPECIFICATIONS

Made in: Germany

HS Code: 49059900

DESCRIPTION

Everyone who is drawn to the wonderful Channel Islands is well served with the FR2. This trip has to be well prepared, because as harmless and romantic the individual islands are, the more treacherous the crossing can be. You should avoid wind against tide situations and should have your own dinghy to get to some islands. The coast from Cherbourg to St. Malo offers not only historical things like Le Mont-Saint-Michel but also fantastic beaches and sometimes a tidal range of 14m. In addition, this stretch of coast trumps with some beautiful towns that stand for the special atmosphere of Brittany. We can particularly recommend Saint-Malo - a city with a historic center that is completely surrounded by a city wall. Thanks to the clear structure, the skipper can quickly find approaches, harbours and anchorages and is informed of important navigational details that also appear in the NV Charts app. The chart series impresses with its optimal scales and balanced sheet cuts. This map set contains: 4 Passage Charts 13 Coastal Charts 13 Details Charts Code for the app Digital charts & navigation program Navigation instructions in English and French Tide tables Paper harbour plans & Digital Meets legal requirements for up-to-date paper charts on board NV Atlas chart format NV Charts nautical charts are available in an outstandingly practical, handy atlas booklet format and thus offer many advantages over formats from other manufacturers. The nautical chart series have been designed by nautical experts and passionate water sports enthusiasts with the needs of recreational boating in mind. The NV Atlas has a very flat staple binding in the middle, so that the course triangle can also be used there without any problems. This innovative development makes it possible to look up charts quickly and always have them in the best possible order at the same scale. The NV Atlas is delivered in a plastic cover protected against splash water. This modern nautical chart format is very popular on sailing boats as well as on motor yachts and is the preferred choice of many of our customers.
