Used in conjunction with Guidelines for Collecting Maritime Evidence Volume 2, this book explains all that mariners need to know about fulfilling these evidence requirements while protecting a multitude of interests and without compromising safety and the environment. This series provides Masters, officers and crew the knowledge to collect, secure and preserve evidence, consistent with ISM Code and other regulatory requirements. In this book, a state safety investigator, Masert, insurers, surveyor, lawyer and arbitrator each describe evidence collection from their own expert perspective.
