DESCRIPTION

Cyber Security Workbook for On Board Ship Use - 7th Edition 2026

Stay up to date with industry standards and support compliance with the latest cyber-security guidance
This Workbook serves as a practical and accessible guide for Masters and officers on board (Part I – Onboard Practical Considerations). It also aims to enhance understanding and effective collaboration between vessels, shore-based IT teams and equipment manufacturers (Part II – Shore Management Considerations). Additionally, it offers valuable insight for the wider maritime industry.
The seventh edition has been fully revised, updated and produced by Witherbys, BIMCO and the International Chamber of Shipping (ICS) and includes the latest guidance on:
•Industry guidelines and regulatory requirements, including IACS UR E26 and E27
•cyber security in port
•passenger ships
•ship inspections and port state control
•software updates
•malware detection and prevention
•phishing risks.
Detailed case studies and diagrams have been added to help illustrate cyber risks. The Workbook contains 13 checklists and 6 annexes, including Cyber Security Risk Assessment and Creating a Cyber Security Plan.
Who is it for?
For all maritime personnel including onboard officers, senior management ashore, IT teams and equipment manufacturers, ensuring cyber risk is part of safety and security at every level.
