DESCRIPTION

Safety line - Baltic Supreme 2-hook elastic

A safety line together with a safety harness or lifejacket with integrated safety harness is a good way to avoid falling overboard, or if you fall overboard be able to get on board again. Baltic Supreme 2-hook is a strong elastic safety line made from UV-stabilized polyamide. Equipped with an overload indicator; this shows if the line has been subjected to such a heavy load that the line must be replaced. Two double action safety hooks. Special carabine hooks in aluminum of rock-climbing quality and design. Length 2m. Baltic safety lines are approved according to EN ISO 12401: 2009.
