sMRT V300 AIS, DSC & 121.5 MHz Man Overboard Device

Number: 3.40.0353

SPECIFICATIONS

Measurements: 207 (l) x 59 (w) x 23 (h) mm

Weight: 0,19 kg

Made in: United Kingdom

HS Code: 85255000

DESCRIPTION

The sMRT V300 is a commercial-grade Maritime Safety Locator Device (MSLD) featuring AIS, VHF DSC, and the 121.5 MHz emergency frequency for improved localised alerting, tracking, and recovery. With both manual and automatic water-activated activation, on immersion for 2 seconds, it enhances the speed and efficiency of MOB recovery.

With water-activation technology, audible and visual indicators, and multiple fixing options for life jacket integration, the sMRT V300 significantly enhances the speed and efficiency of MOB recovery. Additionally, its increased signalling range and Class M compliance guarantee accelerated signalling and reliable tracking over extended distances. This advanced technology enhances safety and effectiveness during man overboard incidents.
