### Binoculars Konus - 7x50 - Abyss-2

Number: 1.65.0011

## SPECIFICATIONS

Made in: China

HS Code: 90051000

## DESCRIPTION

Key Features Konus Binoculars Abyss-2 7x50:

- Waterproof and nitrogen-filled construction for clear, fog-free viewing
- 7x magnification with large 50 mm objective lenses for high light transmission
- Specially coated lenses with a dark green anti-reflective coating
- Rubber-armored housing for a secure grip, even in wet conditions
- Central focus wheel for fast and precise focusing

The Konus Abyss-2 7x50 delivers outstanding performance in marine and outdoor environments. Its waterproof and fog-proof design ensures you always maintain a sharp view, even in changing temperatures. The BaK-4 prisms and specially coated optics reduce glare and enhance contrast, which is particularly useful on the water or in the snow.

With a field of view of 112 meters at 1000 meters, you can easily keep track of your surroundings. The large 7.1 mm exit pupil provides a bright image in low-light conditions, such as during twilight. The twist-up eyecups make the binoculars comfortable to use, even for eyeglass wearers.

Despite its rugged design, the binoculars remain highly manageable. Weighing 950 grams, they offer a stable feel in the hand and remain comfortable to use when speed and precision are key. For extended observations, they can easily be mounted on a tripod.

Package Includes:

- 1x Konus Binoculars Abyss-2 7x50
- 1x Carrying case
- 1x Carrying strap
- 1x Cleaning cloth
- 2x Lens caps
