SAILOR SP3540 Portable VHF ATEX GMDSS
Incl. Li-Ion Battery, Charger, Adapter, IS ii2G, EXIBi

SAILOR SP3540 Portable VHF ATEX GMDSS is designed to meet the GMDSS requirements for communication in hazardous marine environments, such as tankers, supply vessels and other offshore operations.

SAILOR SP3540 Portable VHF ATEX GMDSS comes with the international channels that are required for a portable GMDSS VHF, so is fully approved for use as a part of your GMDSS equipment. Enhance safety with a SAILOR GMDSS package that even features an approved portable VHF ATEX, which acts as a reliable tool for improving your operational communications.

SAILOR SP3540 Portable VHF ATEX GMDSS conforms to the 94/9/EC ATEX Directive. The approved rating is II 2 G Ex ib IIC T4.

With proven, rugged reliability, you can meet requirements and improve safety and efficiency on board all vessels certified as hazardous environments.

Designed and built to high SAILOR standards, SAILOR SP3540 Portable VHF ATEX GMDSS fits comfortably in your palm, is waterproof to IP67, and features a large clear screen.

Out on deck, in high seas and driving rain, you will always get the message and the ribbed grip design means that even with gloves on in wet conditions, you will not drop this VHF and find yourself out on your own.
