Klinifix Cohesive Elastic Fixation Bandage - White - 4m x 6cm

Number: MEII223RST1

IMPA number: 391819

SPECIFICATIONS

Made in: Netherlands

HS Code: 30059010

DESCRIPTION

Klinifix cohesive is a self-adhering, latex-free fixation bandage. It is used for fixating wound coverings, splints and infusion system on mobile. Can be used on mobile or round body parts. Because this cohesive bandage attaches and sticks to itself, fixation is easy, fast and saves material costs. The elasticity and adhesive power prevents displacement of the bandage even after wearing it for several days. This bandage is made of 40% cotton, 30% viscose and 40% polyamide. It adheres to itself and will not adhere to skin, hair or clothes because of a latex-free rubber impregnation.
