

## ARTICLE

**Quin. Dihydroch. 600mg2ml - 5 amp**

Number: ME7704ST5

## SPECIFICATIONS

HS Code: 30049000

## DESCRIPTION

Quinine dihydrochloride for injections is a concentrated solution and must be diluted before use. This medicine is used for the treatment of severe malaria or when the patient is unable to take medication by mouth. It is also used in the treatment of Babesiosis, a rare disease caused by an infection carried by ticks.
