Syringe 2-Part Without Needle - 2ml *S*

Number: MEI1514ST1

IMPA number: 391310

SPECIFICATIONS

Made in: Netherlands

HS Code: 90183110

DESCRIPTION

Disposable Syringes with Luer Connector

The Teqler disposable syringes with luer connectors have a smooth-gliding piston and an highly transparent cylinder. The contrast between the black scale and transparent plunger makes it quite easy to read the fill level of the single-use syringe. The treaded plastic grips provide a reliable hold during injection and allow for delicate injection. These sterile disposable syringes with a smudge-proof scale are available in various sizes from 2 to 20 ml.

Product Details for the Disposable Syringes

Disposable syringes with Luer connector
Economical standard syringes for universal application
Smooth-gliding piston for exact dosing
