Calcium gluconate 2,5 percent jel. - 30 gram

Number: ME10101ST1

IMPA number: 391907

SPECIFICATIONS

Made in: China

HS Code: 30049000

DESCRIPTION

Calcium gluconate gel is an effective topical 2.5% that is used in first aid response to hydrofluoric acid (HF) exposure or contact to the body. Calcium gluconate combines with hydrofluoric acid to neutralize the powerful fluoride ion. Calcium gluconate gel is indicated as an integral part in responding to Hydrofluoric Acid exposure to the body, mitigating or preventing the related pain and potential tissue burns and bone damage. For external use only.
