Drug Test Multi 12 Urine Test

Number: 4.26.0070

SPECIFICATIONS

Made in: Netherlands

HS Code: 38220000

DESCRIPTION

Multi-Drug: 12 Panel Drug Test Dip Card (Urine)

The Multi-Drug 12 panel test from Abbott is designed for the simultaneous, qualitative detection of 12 drug metabolites at specific cutoff levels in human urine. The dip test in panel form provides a result on the presence of the different substances in only 5 minutes. The results can be read on the test cassette.

Due to the quick overview of the type of substances consumed and the wide range, the urine drug test is particularly well suited for use by police and A&E departments.

Product Details

12 Panel Multi-drug test

Urine dip test

Easy to use test cassette

Test duration: 5 minutes
