Rescue Tripod - height 1,9 - 2,9 mtr

Number: 4.10.0094

SPECIFICATIONS

Weight: 22,30 kg

Made in: India

HS Code: 84289090

DESCRIPTION

Rescue Tripod (height: 1.9 - 2.9 meter) including carry bag

The tripod (height: 1.9 m - 2.9 metres) is used for lifting/lowering employees or material in/out of confined spaces. The tripod is equipped with a mounting point, so that winches and fall arrest devices can be securely attached to the tripod.

Properties:

At the top of the tripod are in line with the main leg two pulleys fitted to guide cables.

Two additional eyebolts act as mounting points.

The headpiece is made of die-cast aluminum alloy and the legs are aluminum.

Steel feet with rubber sole for a better grip and more stability.

Anchor point force > 12 kN.

Includes bag.

Compliance – EN 795:2012 Type B.

Maximum load – 500 kg.
