Fall arrest device 10 mtr - 4,5mm thick steel cable - for Tripod

Number: 4.10.0096

SPECIFICATIONS

Weight: 4,54 kg

Made in: India

HS Code: 84289090

DESCRIPTION

Fall arrest device with 4.5mm thick and 10 m long galvanized steel cable and an internal brake that reduces the fall force to less than 6 kN. Fitted with a snap hook at the attachment end.

Properties:

Casing made of impact resistant polymer to prevent breakage.

Equipped with a 4.5mm thick galvanized steel cable with grip, for better grip on the lanyard.

An internal brake reduces the fall force to less than 6 kN.

Equipped with an external shock absorber.

Supplied with a swivel hook on the anchoring end.

Breaking force > 12 kN.

Length – 10 m.

Conformity – EN 360:2002.

PART SPECIFICATIONS

Polymer housing: PA 6 30% glass fiber

Cable: Galvanized Steel

Connectors: Steel

Grip: Rubber

Weight: 4.54KG
