### Bedpan with lid - Stainless steel

Number: MEI1612ST1

## SPECIFICATIONS

Made in: Netherlands

HS Code: 39229000

## DESCRIPTION

The stainless steel bedpan with lid from Teqler facilitates use for nursing staff and patients thanks to its ergonomically shaped rim. The comfortable handle enables safe placement of the bedpan and ensures a comfortable distance to the patient. With the knob lid, the bedpan can be covered hygienically and the bedpan can then be cleaned or disinfected.

Since the bedpan is made of stainless steel, it can even be autoclaved. Due to its size (diameter 30 cm; height 9.5 cm), it is suitable for cleaning in the bedpan cleaner, which makes cleaning the bedpan easier. Whether you work with bedridden patients in inpatient or home care - the bedpan with lid greatly simplifies using the toilet for patients and caregivers.
