Earmuffs Peltor Optime II H520A

Number: 4.11.0202

SPECIFICATIONS

Made in: Poland

HS Code: 62114310

DESCRIPTION

The Optime II has been developed for environments with heavy noise exposure. This ensures maximum sound attenuation, even of extremely low frequencies.

The sealing rings are filled with a unique combination of liquid and foam. These ensure an optimum seal with low contact pressure that also feels pleasant to the touch during prolonged use.

The sealing rings are equipped with ventilation shafts and are covered with a soft hygienic foil specially developed for this purpose.

The Optime II earmuffs are particularly suitable for environments with heavy industrial noise levels or for construction machinery, airports and agricultural work.
