Insecticide Topscore or Sprigone Spray - 400ml

Number: MEII813AST1

SPECIFICATIONS

HS Code: 38089190

DESCRIPTION

Usage:

Topscore® Spray is a powerful aerosol for the control of flying and crawling insects in living, working and accommodation areas. Topscore® Spray instantly fights flies, mosquitoes, wasps, moths, ants, cockroaches, beetles, silverfish, fleas and other pests. Topscore® Spray combines a very fast initial effect with a long after effect.

Instructions:

Against crawling insects

Method of application: spray directly the places where the pests occur. Also treat the places where insects regularly reside (cracks, crevices, behind skirting boards, etc.). For the treatment against fleas, the entire floor surface must be sprayed. Topscore® Spray has a long after effect; therefore do not wash treated surfaces.

Note: Always carry out a test before applying to valuable substances and materials.

Against flying insects

Dose: spray the product for 1 second per 10 m³ of space.

Application method: close doors and windows. Then spray Topscore® Spray into the 4 upper corners from the center of the room. Keep the area tightly closed after treatment and do not enter for 4 hours. Then ventilate thoroughly. If the hiding places are difficult to reach (eg wasp nests), it is sufficient to spray the nest opening or the entry opening.
